# RHINO CONSERVATION EXPERIENCE

Begin your conservation experience with a short helicopter flight into the conservation area. On arrival, you will meet with our expert team of guides and our wildlife veterinarian for a short briefing on the day's procedures.

Once the brief has been completed and a suitable animal has been located and darted by our wildlife vet, you will be safely escorted into the area by our guides to begin assisting our vet and his team with the vital tasks that need to be conducted during the wildlife conservation procedures. Enjoy exclusive access and an incredibly intimate and personal encounter with these incredible animals as you assist our team in taking measurements, administering antibiotics, monitoring vital signs and taking DNA samples for future conservation efforts.

Once all procedures have been completed, the reversal drug will be administered and you will be safely escorted back to your vehicle where you can watch the animal slowly wake up and make its way back into the bush. After a quick debrief, you will be flown back to your villa for a well deserved lunch and some drinks!
